

A woman with long blonde hair, wearing a dark blue dress, is sitting at a table and smiling while looking at her smartphone. She has a red folder with papers on her lap. In the foreground, another person's hands are visible, holding a white marker and a black device, possibly a scanner or a tablet. The background is a blurred outdoor setting with trees and a building.

Sage ERP X3
Sage Enterprise Intelligence

All you need to know about your company right at your fingertips...

Many companies today are challenged with trying to access information stored in their enterprise software systems in a timely and meaningful manner. They often have to rely on a number of rudimentary, technical and time-consuming ERP and Third Party analysis and reporting tools to make important business decisions.

Sage Enterprise Intelligence is an innovative, self-service Business Intelligence solution engineered for ease of use and performance. Sage Enterprise Intelligence's intuitive User Interface and advanced features provide real-time access to enterprise-wide information, quickly and securely. More than BI, Sage Enterprise Intelligence supports data entry and business logic applications such as budgeting and forecasting. Sage Enterprise Intelligence is a comprehensive, single Business Intelligence offering that helps companies of any size improve business performance management.

Features and Benefits

- Intuitive User Interface
- Real-Time Access to enterprise data
- Fast to deploy, simple to administer

- Low Total cost of Ownership
- Used by thousands of satisfied users

Sage Enterprise Intelligence helped us soon realize that our previous reporting tools were inaccurate.

– Benoit Brasseur,
Engineer, Pompacktion Inc.

Access enterprise data transparently across all systems

Easy Access

Sage Enterprise Intelligence's intuitive User Interface makes it easy to access enterprise information quickly and securely. Sage Enterprise Intelligence is fast to deploy and administer, and it uses technology that you already own. It's powerful yet easy to learn features and function provides self-service data analysis and reporting for everyone.

Real-Time

The need for companies to have immediate access to critical business information has never been so important. Sage Enterprise Intelligence is designed and engineered to provide realtime, integrated and high performing access to multiple data sources. Users have everything they need at their fingertips to make informed and timely business decisions.

Beyond BI

Sage Enterprise Intelligence's advanced features include data entry and business logic capabilities. It's open framework can be used to build Sage Enterprise Intelligence processes such as budgeting and forecasting, with the ability to validate and transfer data between Sage Enterprise Intelligence and enterprise software applications.

Secure

Sage Enterprise Intelligence's own security layer makes optimal use of existing standard database security to ensure the protection of your enterprise data and its integrity. It also provides powerful security features, including the ability to add field level controls to your existing data. Keep it simple or take advantage of Sage Enterprise Intelligence's powerful security layer to ensure that critical business information is never compromised.

Major benefits:

- Access enterprise data transparently across all systems and databases.
- Simple to use, yet powerful and rich in features and function.
- Fast to deploy, simple to administer.

Our management team endorsed Sage Enterprise Intelligence immediately! Accessing and consolidating sales data across our enterprise is very easy.

– Edith Lauzon,
Director of Finance and Operations, Avmor Ltd.
